

“Changes in Healthcare Supply Chain Management”

Overview: As the healthcare industry continues to change, the supply chain must evolve as well. This presentation will touch on the changes to the industry and the supply chain service offerings in the market.

About the Presenter: Vicky Lyle is the Director of Performance Development, Inventory Services at Owens & Minor. She is responsible for evaluating new business opportunities with solution partners, the execution of technology development, developing pricing strategies, and the ongoing development of the inventory service offerings for healthcare providers. Vicky has over 25 years with Owens & Minor and has contributed business and technical expertise across all facets of the supply chain. She has led several strategic cross-functional projects, including business acquisitions, distribution center strategy, and the creation of Owens & Minor’s Third Party Logistics (3PL) service offering, which was recently named in the top 100 3PL offerings by Inbound Logistics. Vicky holds a B.A. in Business Administration from Averett University, where she graduated Magna Cum Laude. Vicky serves on the executive board for Professional Women in Healthcare (PWH).
